BABY RAMBLER ROSES ARE THE IDEAL BEDDING PLANT

Baby Rambler Roses are truly the ideal bedding plant, as they bloom prolifically all summer, and unlike the ordinary bed of annuals, once planted they become a permanent feature, increasing in beauty year after year. Plan a bed of Baby Rambler Roses this coming spring, in place of the Geranium bed or bed of other annuals you usually plant. You will find it more beautiful, more satisfactory, and next year it will be there in its increasing beauty, without the labor and expense of replanting.

Baby Rambler Roses are also ideal for planting along your walks, driveways, and their brilliant clusters are like ribbons of color along the walks and driveways, and garden borders. For continuous hedges set plants 15-18 inches apart.

Baby Rambler Roses are also ideal for low growing hedges, seldom growing higher than 18-24 inches, they are now used extensively for that purpose, providing a good low growing hedge with a continuous, sparkling show of flowers.

A surplus of Baby Rambler Roses, in reds, whites, and pinks, enables us to make a very special price on this desirable class of Rose for early Spring delivery, fine bushy 2-3 year old field grown plants that regularly retail at 50c to 75c each, specially priced at 5 for \$1.49, 10 for only \$2.89, if you place your order immediately, or not later than New Year's Day.
